PART I: GENERAL INSTRUCTIONS

1. Structure and other conventions

1.1. Structure

1. This Annex contains additional instructions for the templates (hereinafter “LR”) included in Annex X of this Regulation.
2. Overall, the framework consists of five templates:
 - C47.00: Leverage Ratio Calculation (LRCalc): Leverage ratio calculation;
 - C40.00: Leverage Ratio Template 1 (LR1): Alternative treatment of the exposure measure;
 - C43.00: Leverage Ratio Template 4 (LR4): Alternative breakdown of leverage ratio exposure measure components; and
 - C44.00: Leverage Ratio Template 5 (LR5): General information.
 - C48.00: C 48.00 Leverage ratio volatility (LR6)
3. For each template legal references are provided as well as further detailed information regarding more general aspects of the reporting.

1.2. Numbering convention

4. The document will follow the labelling convention set in the following paragraphs, when referring to the columns, rows and cells of the templates. These numerical codes are extensively used in the validation rules.
5. The following general notation is followed in the instructions: {Template;Row;Column}. An asterisk sign will be used to refer to the whole row or column.
6. In the case of validations within a template, where only data points from that template are used, notations will not refer to a template: {Row;Column}.
7. For the purpose of the reporting on leverage, “of which” refers to an item that is a subset of a higher level exposure category whereas “memo item” refers to a separate item that is not a subset of an exposure class. Reporting of both types of cells is mandatory unless otherwise specified.

1.3. Abbreviations

8. For the purposes of this annex and related templates the following abbreviations are used:
 - a. CRR, which is an abbreviation of Capital Requirements Regulation and shall mean Regulation (EU) No 575/2013;
 - b. CRD, which is an abbreviation of Capital Requirements Directive and shall mean Directive 2013/36/EU;

- c. SFT, which is an abbreviation of Securities Financing Transaction and shall mean “repurchase transaction, securities or commodities lending or borrowing transaction, or margin lending transaction” as referred to in point (139) of Article 4(1) in Regulation (EU) No 575/2013;
- d. CRM, which is an abbreviation for Credit Risk Mitigation.
- e. CSD, which is an abbreviation for Central Securities Depository.
- f. QCCP, which is an abbreviation for Qualifying Central Counterparty.
- g. PFE, which is an abbreviation for Potential Future Exposure.

1.4. Sign convention

- 9. All amounts shall be reported as positive figures. With the exception of:
 - a. The items whose label is preceded by a negative sign (-), where no positive figure is expected to be reported for that item.
 - b. {LRCalc;0310;0010}, {LRCalc;0320;0010}, {LRCalc;0330;0010}, {LRCalc;0340;0010}, which could take negative values in extreme cases, otherwise they take positive values.
 - c. {LRCalc;0280;0010} can take a positive values due to Article 473a (7) CRR, otherwise they take negative values.

PART II: TEMPLATE RELATED INSTRUCTIONS

1. Formulas for leverage ratio calculation

1. The leverage ratio is based on a capital measure and a total exposure measure, which can be calculated with cells from LRCalc.
2. Leverage Ratio – fully phased-in definition = {LRCalc;0310;0010} / {LRCalc;0290;0010}.
3. Leverage Ratio – transitional definition = {LRCalc;0320;0010} / {LRCalc;0300;0010}.

2. Materiality thresholds for derivatives

4. In order to reduce the reporting burden for institutions with limited exposures in derivatives, the following measures are used to gauge the relative importance of derivatives exposures to the total exposure of the leverage ratio. Institutions shall calculate these measures as follows:

5. Derivatives share = $\frac{\text{Derivative exposure measure}}{\text{Total exposure measure}}$.

6. Where the derivative exposure measure is equal to: $\{ \{ \text{LRCalc;0061;0010} \} + \{ \text{LRCalc;0065;0010} \} + \{ \text{LRCalc;0071;0010} \} + \{ \text{LRCalc;0081;0010} \} + \{ \text{LRCalc;0091;0010} \} + \{ \text{LRCalc;0092;0010} \} + \{ \text{LRCalc;0093;0010} \} + \{ \text{LRCalc;0101;0010} \} + \{ \text{LRCalc;0102;0010} \} + \{ \text{LRCalc;0103;0010} \} + \{ \text{LRCalc;0104;0010} \} + \text{LRCalc;0110;0010} + \{ \text{LRCalc;0120;0010} \} + \{ \text{LRCalc;0130;0010} \} + \{ \text{LRCalc;0140;0010} \} \}$

7. Where total exposure measure is equal to: {LRCalc;0290;0010}.
8. Total notional amount referenced by derivatives = {LR1; 0010;0070}. This is a cell that institutions shall always report.
9. Credit derivatives volume = {LR1;0020;0070} + {LR1;0050;0070}. These are cells that institutions shall always report.
10. Institutions are required to report the cells referred to in paragraph 13 if any of the following conditions is met:
 - a) the derivatives share referred to in paragraph 5 is more than 1.5%;
 - b) the derivatives share referred to in paragraph 5 exceeds 2.0%.

The entry and exit criteria of Article 4 of this Regulation shall apply, except for point (b) where institutions shall start reporting information from the next reporting reference date, where they have exceeded the threshold on one reporting reference date.

11. Institutions for which the total notional amount referenced by derivatives as defined in paragraph 8 exceeds 10 billion € shall report the cells referred to in paragraph 13, even though their derivatives share does not fulfil the conditions described in paragraph 10.

The entry criteria of Article 4 of this Regulation shall not apply for paragraph 4. Institutions shall start reporting information from the next reporting reference date where they have exceeded the threshold on one reporting reference date.

12. Institutions are required to report the cells referred to in paragraph 14 if any of the following conditions is met:

- a) the credit derivatives volume referred to in paragraph 9 is more than 300 million €
- b) the credit derivatives volume referred to in paragraph 9 exceeds 500 million €

The entry and exit criteria of Article 4 of this Regulation shall apply, except for point (b) where institutions shall start reporting from the next reporting reference date where they have exceeded the threshold on one reporting reference date.

13. The cells which are required to be reported by institutions in accordance with paragraphs 10 and 11 are the following: {LR1;0010;0010}, {LR1;0010;0020}, {LR1;0020;0010}, {LR1;0020;0020}, {LR1;0030;0070}, {LR1;0040;0070}, {LR1;0050;0010}, {LR1;0050;0020}, {LR1;0060;0010}, {LR1;0060;0020}, and {LR1;0060;0070}.

14. The cells which are required to be reported by institutions in accordance with paragraph 12 are the following: {LR1;0020;0075}, {LR1;0050;0075} and {LR1;0050;0085}.

3. C 47.00 – Leverage ratio calculation (LRCalc)

15. This template collects the data that are needed to calculate the leverage ratio as defined in Part Seven CRR.

16. Institutions shall perform the reporting of the leverage ratio quarterly. In each quarter, the value “at reporting reference date” shall be the value at the last calendar day of the third month of the respective quarter.

17. Institutions shall report the items in the Exposure values section with positive sign in accordance with the sign convention in paragraph 9 of Part I of this Annex (excluding {LRCalc;0270;0010} and {LRCalc;0280;0010}), as if the items with a negative sign (for example exemptions/deductions) in accordance with the sign convention in paragraph 9 of Part I of this Annex did not apply.

18. Any amount that increases the own funds or the leverage ratio exposure shall be reported as a positive figure. On the contrary, any amount that reduces the total own funds or the leverage ratio exposure shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item no positive figure is expected to be reported for that item.

19. Where an amount could qualify for deduction on multiple grounds, the amount shall only be reduced from the exposure in one of the rows of template C47.00.
