Introduction

The EBA conducts semi-annual Risk Assessment Questionnaires (RAQs) among banks and market analysts. This booklet presents a summary of responses to the RAQs carried out between September and October 2017. 38 banks and 21 market analysts submitted the answers. The RAQ results are published together with the EBA’s quarterly Risk Dashboard. They are also one of the sources of the EBA’s annual Risk Assessment Report, as published on 24 November 2017.

The results are presented in an aggregated form. The charts are numbered, with numbers corresponding to the questions in the distributed questionnaires, which can be found in the Appendix. Results for the same question from former questionnaires may be presented where deemed relevant. For questions for which only one answer was permitted, any potential difference between the sum of shown responses and 100% is due to respondents answering either “n/a” or “no opinion”.

Should you wish to provide your feedback and/or comments on this booklet, please do not hesitate to do so by contacting risk.assessment@eba.europa.eu.
Summary of the main results

Against the backdrop of benign market conditions, the results of the EBA’s RAQs show that banks’ profitability remains a challenge, even though a slight improvement is expected for the near future. Volume growth is anticipated in specific portfolios like SME and retail lending. On the funding side, banks are expected to attain more instruments eligible for MREL going forward, even though the uncertainty on the specific MREL requirements is considered as a constraint to their issuance. Cyber risk and data security are considered as the main drivers for an increase in operational risk. They are also assumed to be the main factors that might negatively influence market sentiment, along with the uncertainties about the UK’s decision to leave the EU.

Business model / strategy / profitability

- Most of the banks expect a change in their assumed level of Cost of Equity. 65% of the banks estimate their CoE between 8% and 10% (up from about 60% in June 2017 and 50% in December 2016), while only less than 8% estimate their CoE at a level below 8% (down from more than 10% in June 2017 and more than 15% in December 2016). The share of banks that agree that their current earnings are covering the CoE remains unchanged at about 50%. Moreover, half of the banks replied that they can operate on a longer-term basis with a Return on Equity (RoE) ranging between 10% and 12% (down from 60% in June 2017). At the same time, the number of banks that are able to operate with a RoE below 10% increased from 20% (June 2017) to now 30%. (Questions 2, 6 and 7 for banks).

- On a similar note, about 75% of banks “agree” and “somewhat agree” that their profitability will increase in the next six to twelve months, down from 80% in June. Similarly, more than 80% (“agree” and “somewhat agree”) of the market analysts assume that overall profitability will improve, which is unchanged from June 2017. Banks consider net fees and commission income as the main driver for increasing profitability (about 90% “agree” and “somewhat agree”), followed by further costs reduction (about 80% “agree” and “somewhat agree”). Net interest income is considered as the third most important driver (about 60% “agree” and “somewhat agree”). (Questions 3 and 4 for banks and Question 1 for market analysts).

- Geopolitical risks remain a key risk according to market analysts (agreement of 60% down from more than 65% in June 2017). The uncertainties about the UK’s decision to leave the EU and monetary policy trends rank high in their opinion (agreement of about 30% for each driver), while a smaller number of market analysts see litigation risks as drivers for negative market sentiment (down from almost 70% in December 2016 and 30% in June 2017 to less than 25% in December this year). The general perception on the risks from elections and referendums decreased with respect to June, as drivers such as IT/cyber risks or the risk of asset price bubbles (both at 24%). (Question 3 for market analysts).

- More than half of market analysts expect material negative implications to EU banks’ business, should ongoing negotiations on the terms of the UK’s withdrawal from the EU end in an inconclusive or disorderly fashion. The answer to this question for banks shows that only 10% of them saw implications for their own business, suggesting a degree of cautious thinking, as a large number of them (almost
40%) expects the **continuity of financial contracts** between parties from the EU 27 and the UK to be a source of concern. *(Question 8 and 9 for banks and Question 4 for market analysts)*

**Funding / liquidity**

- More than 60% of banks expect a **steepening yield curve** to positively impact their bank’s earnings in the next 6 – 12 months, while in June around 30% of them more broadly stated that they would see a material impact (positive or negative). *(Question 10 for banks)*

- Less market analysts expect that banks will be able to issue **AT1 instruments** during the rest of 2017 (about 60% from almost 70% in June) whereas almost 70% of them expect that banks will be able to issue **T2 instruments** (up from less than 60% in June). 60% of them expect that banks will be able to issue **MREL/TLAC eligible debt instruments**. *(Question 7 for market analysts)*

- The majority of banks intend to attain more **instruments eligible for MREL** (agreement of almost 55%; this debt class was newly added in this version of the RAQ), while a smaller number intends to rely on **retail deposits** (35% from 55% in June this year). Only 15% of the banks plan to issue **senior unsecured** funding (45% in June). Also less market analysts expect banks to issue more senior unsecured instrument (down to 40% from almost 60% in June), while 86% of them expect banks to attain more instruments eligible for MREL. Banks believe that the main constraints to issue subordinated instruments eligible for MREL are the **uncertainty on the specific MREL requirements**, namely the amounts (60% of banks) and the eligibility of the instruments (55%). Neither banks nor market analysts assume that more central bank funding will be attained (agreement of 0%, down from almost 20% for banks and 45% for market analysts in June 2016). *(Question 12 and 13 for banks and Question 8 for market analysts)*

**Asset volume trends and asset quality**

- In line with June 2017 and December 2016, the majority of the banks plan to increase their volumes of **SME financing** (more than 80%), while a smaller number of banks says that they will increase their **consumer credit** and **residential mortgage** exposures. **Trading** is increasingly considered as a portfolio for which volumes are expected to increase (more than 10% from 3% in June), along with structured finance (45% with respect to 30% in June). Market analysts show a similar opinion on the portfolios for which an increase is expected (agreement of about 95% for SME loans) even though they also see an increase in **corporate loans** (for about 90% of them). *(Question 15a for banks and Question 9a for market analysts)*

- The portfolio for which the biggest share of banks plan a decrease in volumes, in line with June 2017, is **Commercial Real Estate** (CRE), including all types of real estate developments (agreement of more than almost 30%, slightly up since June). Compared to June this year, also **sovereign and institutions**, along with **asset finance** (shipping, aircrafts etc.), rank high in the portfolios for which a decrease in volume is expected (both at almost 30% from 20%). Less market analysts consider CRE as a portfolio which will decrease (agreement of 50%, down from 70% in June). Finally, about 90% (“agree” and “somewhat agree”) of the market analysts expect more **asset sales** in specific loan portfolios (e.g. CRE) and a lower number (less than 80%) in specific geographies. *(Question 15b for banks and Questions 9b and 11 for market analysts)*
Banks assume that nearly the same portfolios which they plan to increase in volumes will **improve in terms of asset quality** (namely SME, for more than 50% of them but also corporate loans with an increasing trend with respect to June). A larger number of banks expect trading to improve in terms of asset quality in the next twelve months (almost 20% agreement from 5% in June), which might be the reason for the expected increase in volume reported for this portfolio (see answer to Question 15a for banks). Market analysts’ expectations are relatively similar: improvements in asset quality are mainly expected for SME financing (increasing to 75% from 70% in June) and for corporate loans (75% from 50% in June). *(Question 16a for banks and Question 12a for market analysts)*

A deterioration in asset quality is mainly assumed for asset finance, even though for a lower portion of respondents (agreement of about 13% by banks, down from 20% in June and about 40% in December 2016), whereas for market analysts the agreement is of almost 60%, up from 50% in June. A higher number of banks expect an increase in the level of impairments in the next 12 to 18 months (almost 30% from 20% in June), while more than 40% expect provisions to remain at roughly the same level (down from 55% in June). *(Questions 16b and 18 for banks and Questions 12b for market analysts)*

Banks consider lengthy and expensive judiciary processes to resolve insolvency and to **enforce the repossession of collaterals** as one of the main impediments to resolve non-performing loans (NPL) (agreement of about 55%, slightly down compared to June 2017). The lack or scarce liquidity of a market for transactions in NPLs and / or collaterals is considered another important impediment (agreement of about 55% up from 50% in June). *(Question 19 for banks)*

**Conduct / reputation / operational risk**

More than 55% of the banks expect an increase in operational risks in their institution (up from less than 45% in June). The main drivers identified by the banks are cyber risk and data security (around 40% of banks) and compliance with regulatory initiatives (25%). *(Question 22 for banks)*

**FinTech**

In this issue of the RAQ banks were also asked to give feedback on how their business is affected by FinTech related trends.

The majority of banks see FinTech companies as a threat to revenues in business lines such as payments and settlements (60%) and retail banking (almost 50%). However, almost 40% of banks instead consider technology as an opportunity to increase revenues in the commercial banking line. Banks mostly reported to be using biometric features (as alternative to conventional authentication through the username/password/token systems) and digital wallet solutions for mobile payments using near-field communication (NFC). *(Question 23 and 24 for banks)*

When asked what their current relation with FinTech companies and emerging technologies/products is, more than 90% of banks responded to be forming commercial partnerships (e.g. joint ventures) with existing Fintech companies to offer new products/services. 100% of them believe that the main driver for having a relation with FinTech companies and/or products/services is the increase in revenues. *(Questions 25 and 26 for banks)*
General open questions

- In the open question about sources of risks and vulnerabilities which are expected to increase further in the next six to twelve months, banks mainly refer to regulatory risks and other types of risks (such as shadow banking, Fintech and cyber risk). Market analysts mainly refer to the introduction of new accounting standards.
1. Business model / strategy / profitability

Question 1: December 2017 results

Q1 You envisage making material changes to your bank’s business model going forward.

If you agree:

Question 12 (only “agree” as possible answer)

Q12 You intend to attain more (please do not agree with more than 2 options):
   a. Senior unsecured funding.
   b. Instruments eligible for MREL.
   c. Subordinated debt.
   d. Secured funding (covered bonds).
   e. Securitisation
   f. Deposits (from wholesale clients)
   g. Deposits (from retail clients)
   h. Central Bank funding.
   i. Short-term interbank funding.

Option b) was newly added to the questionnaire in December 2017 and for this reason it does not show any comparative data for former periods.

Question 13: December 2017 results

Q13 Which are the main constraints to issue subordinated instruments eligible for MREL (please do not agree with more than 2 options)?
   a. Pricing (the instruments’ yields are too high)
   b. No sufficient investor demand (e.g. these instruments are not attractive in risk-return considerations)
   c. No sufficient investor demand (due to regulatory and supervisory uncertainty)
   d. Uncertainty on required MREL amounts
   e. Uncertainty on eligibility of instruments for MREL
3. Asset volume trends

Question 14: December 2017 results

Q14 Further asset deleverage is an element of your strategy.

If applicable, your deleveraging strategy is driven primarily by (please do not agree with more than 3 options):

a. Reduced demand for credit and transactions.

b. Disposal of business units and asset sales.

c. Funding constraints.

d. Reduce reliance on central bank funding.

e. Constraints to current and future capital levels.

f. Decisions to further de-risk business lines.

Q17 Does your bank have significant exposure in portfolios of car loans and credit card finance?

If you agree: a. You expect increasing risk levels in these portfolios in the next 12 months.
Question 18 (only “agree” as possible answer)

Q18 Based on your view on future trends in credit quality and impairment levels for your bank, impairment provisions over the time horizon of the next 12-18 months:

- a. Will increase.
- b. Will remain at roughly the same level.
- c. Will decrease.

Question 19 (only “agree” as possible answer)

Q19 What are the impediments to resolve non-performing loans (please do not agree with more than 3 options)?

- a. Lack of financial resources
- b. Lack of qualified human resources
- c. Tax disincentives to provision against and write off NPLs
- d. Lengthy and expensive judiciary process to resolve insolvency and enforce on collateral
- e. Lack of out-of-court tools for settlement of minor claims
- f. Lack of a market for NPLs/collaterals
- g. Lack of public or industry-wide defeasance structure (bad bank) (additional option which seems to be missing)
- h. Other
- i. There is no impediment
5. Conduct, reputation and operational risk

- b. Overall cost efficiency will improve
- c. Total revenues will increase
- d. Net interest margin will increase
- e. Provisions/Impairments will increase
Question 2 (only “agree” as possible answer)

Q2 The current market sentiment is positively influenced by the following factors (please do not agree with more than 3 options):

- Adjustments in business models and strategies with expectations of effective delivery
- Improved risk metrics for banks (capital, funding, liquidity, asset quality) and positive impact of new regulatory...
- Stronger earnings
- Changing governance and risk culture (incl. lower risk appetite,)
- Improved market sentiment due to regulatory and policy steps (TLTRO, QE, ESM, banking union, etc.) adjusting downward tail...
- Regulatory easing through competition between countries / regions?
- Expectation of increasing benchmark interest rates
- More transparency and visibility in banks’ financial disclosures, such as Pillar 3

Questions without comparative data for former periods were newly added to the questionnaire in June 2017. The possible answer 3.o) was slightly reworded with respect to June this year.

Question 3 (only “agree” as possible answer)

Q3 The current market sentiment is negatively influenced by the following factors (please do not agree with more than 4 options):

- Monetary policy divergence between the EU and other countries
- Monetary policy trends in the EU (incl. deflation)
- Geopolitical risks (e.g. risks from war, terrorism etc. that have impact on other countries)
- Emerging market risks (e.g. fast decrease in asset quality, higher volatility of asset and FX markets in emerging countries)
- IT/cyber risks
- Litigation risks of banks
- Decreasing market liquidity
- Risks of increasing volatility, e.g. in FX and financial markets
- Asset price bubble(s)
- Re-emergence of the Eurozone crisis
- Regulatory and supervisory uncertainty: risk weights (for credit, market and operational risks, TRIM and similar effects)
- Regulatory uncertainty: BRRD / MREL / TLAC
- Regulatory easing through competition between countries / regions?
- Commodity and energy prices / markets
- Political uncertainty in the EU (elections and referendums on EU membership, regional independence etc.)
- Political uncertainty outside the EU (elections, political instability, conflicts or standstill in emerging and developed countries)
- Uncertainties about the UK’s decision to leave the EU
Question 4: December 2017 results

Q4 You expect material negative implications to EU bank’s business should ongoing negotiations on the terms of the UK’s withdrawal from the EU end inconclusive or in a disorderly fashion.

Question 5: December 2017 results

Q5 The continuity of financial contracts between banks and/or other parties from the EU 27 and the UK is an issue of concern in case of a disorderly or inconclusive conclusion of UK – EU withdrawal negotiations.

Question 6 (only “agree” as possible answer)

Q6 Looking at the EU banking sector, you expect heightened litigation costs in the next 6-12 months:
2. Funding / liquidity

Question 7: December 2017 results

Q7: Do you expect that banks will be able to issue subordinated debt instruments during the rest of this year?

a. Banks will be able to issue BRRD / MREL / TLAC eligible debt instruments
b. Banks will be able to issue AT1 instruments
c. Banks will be able to issue T2 instruments

If you agree or somewhat agree with above: Do you expect increasing costs for such issuances compared to last year?

a. for BRRD / MREL / TLAC eligible debt instruments
b. for AT1 instruments
c. for T2 instruments

Question 7: Comparison with former results

Q7: Do you expect that banks will be able to issue subordinated debt instruments during the rest of this year?

a. Banks will be able to issue BRRD / MREL / TLAC eligible debt instruments
b. Banks will be able to issue AT1 instruments
