r080 c140	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c150	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c160	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c170	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>20% and <=50%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c180	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>50% and <=100%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c190	Metric	Exposure value, net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c200	Metric	Exposure value, net of value adjustments and provisions, deducted from own funds [mi]
	Base	Own funds
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c210	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Standardised Approach
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions

r080 c220	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 1
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue credit assessment

r080 c230	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 2
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue credit assessment

r080 c240	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 3
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue credit assessment

r080 c250	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 4
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue long-term credit assessment

r080 c260		
	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS other
	Methods to determine risk weights	Ratings Based Method
	Risk weights	1250%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue credit assessment

r080 c270		
	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	1250% for positions not subject to any method
	Risk weights	1250%
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Unrated exposure where a derived rating is not used

r080 c280		
	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r080 c290		
	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Securitisation structure	Second loss in ABCP
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r080 c300		
	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r080 c310	Metric	Exposure value, net of value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Internal Assessment Approach
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r080 c320	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Internal Assessment Approach
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r080 c330	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
r080 c340	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of underlying	Underlying positions others than securitisation positions
r080 c350	Metric	Overall effect (adjustment) due to infringement of the due diligence provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
r080 c360	Metric	Adjustment to the risk-weighted exposure amount due to maturity mismatches [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
r080 c370	Metric	Risk weighted exposure amount before CAP [mi]
	Base	Exposures

COREP

r080 c370	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Underlying positions others than securitisation positions
r090 c010	Metric	Total amount of securitisation exposures originated [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c020	Metric	CRM Funded credit protection (Cva) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Funded credit derivatives issued
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c030	Metric	CRM unfunded credit protection adjusted values (G*) - Outflows [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Credit derivatives - Substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c040	Metric	Notional amount retained or repurchased of credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Funded credit derivatives issued repurchased
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c050	Metric	Original exposure pre conversion factors [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c060	Metric	Value adjustments and provision associated with the original exposure [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives

COREP

r090 c060	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c070	Metric	Exposure net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c080	Metric	CRM substitution effects - Unfunded credit protection: adjusted values (GA) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Unfunded credit protection - Substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c090	Metric	CRM substitution effects - Funded credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Financial collateral simple method
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c100	Metric	CRM substitution effects Outflows, net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c110	Metric	CRM substitution effects Inflows, net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c120	Metric	Exposure after CRM substitution effects pre conversion factors, net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives

COREP

r090 c120	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c130	Metric	CRM Financial collateral: adjusted value (Cvam) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques Exposure value adjustment effect (Financial collateral comprehensive method SA)
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of underlying	Securitisation, Re-Securitisation
r090 c140	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c150	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c160	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c170	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>20% and <=50%
	Role in the securitisation process	Originator
	Type of underlying	Securitisation, Re-Securitisation
r090 c180	Metric	Fully adjusted exposure value (E*), net of value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>50% and <=100%

| r090 c180 | Role in the securitisation process | Originator |

	Risk weights	1250%
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Unrated exposure where a derived rating is not used
r130 c330	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Supervisory formula method
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r130 c340	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Supervisory formula method
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r130 c350	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r130 c360	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r130 c370	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Internal Assessment Approach
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r130 c380	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Internal Assessment Approach
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r130 c390	Metric	Reduction in RWA due to value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r130 c400	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r130 c410	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r130 c420	Metric	Overall effect (adjustment) due to infringement of the due diligence provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives

r130 c420	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r130 c430	Metric	Adjustment to the risk-weighted exposure amount due to maturity mismatches [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r130 c440	Metric	Risk weighted exposure amount before CAP [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

r140 c010	Metric	Total amount of securitisation exposures originated [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c020	Metric	CRM Funded credit protection (Cva) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Funded credit derivatives issued
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c030	Metric	CRM unfunded credit protection adjusted values (G*) - Outflows [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Credit derivatives - Substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c040	Metric	Notional amount retained or repurchased of credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Funded credit derivatives issued repurchased
	Role in the securitisation process	Originator
	Type of risk transfer	Synthetic transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c050	Metric	Original exposure pre conversion factors [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c060	Metric	CRM substitution effects - Unfunded credit protection: adjusted values (GA) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Unfunded credit protection - Substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c070	Metric	CRM substitution effects - Funded credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Financial collateral simple method
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c080	Metric	CRM substitution effects Outflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation

r140 c090	Metric	CRM substitution effects Inflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c100	Metric	Exposure after CRM substitution effects pre conversion factors, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c110	Metric	CRM Financial collateral: adjusted value (Cvam) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques Exposure value adjustment effect (Financial collateral comprehensive method SA)
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c120	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c130	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c140	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions

r140 c140	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c150	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>20% and <=50%
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c160	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>50% and <=100%
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c170	Metric	Exposure value, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c180	Metric	Exposure value, including value adjustments and provisions, deducted from own funds [mi]
	Base	Own funds
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c190	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
r140 c200	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures

r140 c200		
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 1 & S/T CQS 1
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
	Use of external ratings	Direct issue credit assessment

r140 c210		
	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 2
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures
	Type of underlying	Securitisation, Re-Securitisation
	Use of external ratings	Direct issue long-term credit assessment

r140 c220		
	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Exposures by Credit Quality steps at reporting date	CQS 3
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation in the most senior tranche and none of the underlying exposures being re-securitisation exposures

r150 c440	Metric	Risk weighted exposure amount before CAP [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Re-Securitisation
	Type of underlying	Securitisation, Re-Securitisation

r160 c050	Metric	Original exposure pre conversion factors [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c060	Metric	CRM substitution effects - Unfunded credit protection: adjusted values (GA) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Unfunded credit protection - Substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Revolving securitisations with early amortisation
r160 c070	Metric	CRM substitution effects - Funded credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Financial collateral simple method
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Revolving securitisations with early amortisation
r160 c080	Metric	CRM substitution effects Outflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques substitution effect
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Revolving securitisations with early amortisation
r160 c090	Metric	CRM substitution effects Inflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Revolving securitisations with early amortisation
r160 c100	Metric	Exposure after CRM substitution effects pre conversion factors, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation

r160 c110	Metric	CRM Financial collateral: adjusted value (Cvam) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques Exposure value adjustment effect (Financial collateral comprehensive method SA)
	Role in the securitisation process	Originator
	Type of risk transfer	Traditional transactions
	Type of securitisation	Revolving securitisations with early amortisation
r160 c120	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c130	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c140	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c150	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>20% and <=50%
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c160	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>50% and <=100%
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c170	Metric	Exposure value, including value adjustments and provisions [mi]

r160 c170	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c190	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
r160 c350	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
	Use of external ratings	Without direct issue credit assessment
r160 c360	Metric	Average risk weight [pi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Methods to determine risk weights	Look-Through-Approach
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation
	Use of external ratings	Without direct issue credit assessment
r160 c390	Metric	Reduction in RWA due to value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment - Revolving securitisations with early amortisation
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Originator
	Type of securitisation	Revolving securitisations with early amortisation

COREP

r210 c290

Exposures by Credit Quality steps at reporting date	CQS 10
Methods to determine risk weights	Ratings Based Method
Role in the securitisation process	Investor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue long-term credit assessment

r210 c300

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	CQS 11
Methods to determine risk weights	Ratings Based Method
Role in the securitisation process	Investor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue long-term credit assessment

r210 c310

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	ALL OTHER CQS
Methods to determine risk weights	Ratings Based Method
Risk weights	1250%
Role in the securitisation process	Investor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue credit assessment

r210 c320

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Methods to determine risk weights	1250% for positions not subject to any method
Risk weights	1250%
Role in the securitisation process	Investor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Unrated exposure where a derived rating is not used

r210 c330

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Methods to determine risk weights	Supervisory formula method
Role in the securitisation process	Investor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.

| r210 c330 | Type of underlying | Underlying positions others than securitisation positions |

	Methods to determine risk weights	Internal Assessment Approach
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment
r250 c390	Metric	Reduction in RWA due to value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

COREP

r250 c400		
	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

r250 c410		
	Metric	Risk weighted exposure amount [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of risk transfer	Synthetic transactions
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

r250 c420		
	Metric	Overall effect (adjustment) due to infringement of the due diligence provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

r250 c430		
	Metric	Adjustment to the risk-weighted exposure amount due to maturity mismatches [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

r250 c440		
	Metric	Risk weighted exposure amount before CAP [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions

r260 c050		
	Metric	Original exposure pre conversion factors [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions

r260 c060	Metric	CRM substitution effects - Unfunded credit protection: adjusted values (GA) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Unfunded credit protection - Substitution effect
	Role in the securitisation process	Investor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c070	Metric	CRM substitution effects - Funded credit protection [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	Financial collateral simple method
	Role in the securitisation process	Investor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c080	Metric	CRM substitution effects Outflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques substitution effect
	Role in the securitisation process	Investor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c090	Metric	CRM substitution effects Inflows including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c100	Metric	Exposure after CRM substitution effects pre conversion factors, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c110	Metric	CRM Financial collateral: adjusted value (Cvam) [mi]

r260 c110	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques Exposure value adjustment effect (Financial collateral comprehensive method SA)
	Role in the securitisation process	Investor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c120	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c130	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c140	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c150	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>20% and <=50%
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c160	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions

r260 c160	Conversion factors for off-balance sheet items	>50% and <=100%
	Role in the securitisation process	Investor
	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
r260 c170	Metric	Exposure value, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives

	Exposures by Credit Quality steps at reporting date	CQS 10
	Methods to determine risk weights	Ratings Based Method
	Role in the securitisation process	Sponsor
	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Direct issue long-term credit assessment
r320 c300	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures

r320 c300

Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	CQS 11
Methods to determine risk weights	Ratings Based Method
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Most senior tranche.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue long-term credit assessment

r320 c310

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	ALL OTHER CQS
Methods to determine risk weights	Ratings Based Method
Risk weights	1250%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Most senior tranche.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue credit assessment

r320 c320

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Methods to determine risk weights	1250% for positions not subject to any method
Risk weights	1250%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Most senior tranche.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Unrated exposure where a derived rating is not used

r320 c330

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Methods to determine risk weights	Supervisory formula method
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Most senior tranche.
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Without direct issue credit assessment

r320 c340

Metric	Average risk weight [pi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - On-balance sheet items
Exposure class	Items representing securitisation positions
Methods to determine risk weights	Supervisory formula method
Role in the securitisation process	Sponsor

COREP

r320 c340	Type of securitisation	Securitisation. Most senior tranche.
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

r390 c290	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives

COREP

r390 c290

Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	CQS 10
Methods to determine risk weights	Ratings Based Method
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue long-term credit assessment

r390 c300

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	CQS 11
Methods to determine risk weights	Ratings Based Method
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue long-term credit assessment

r390 c310

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	ALL OTHER CQS
Methods to determine risk weights	Ratings Based Method
Risk weights	1250%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Direct issue credit assessment

r390 c320

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Methods to determine risk weights	1250% for positions not subject to any method
Risk weights	1250%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation
Type of underlying	Underlying positions others than securitisation positions
Use of external ratings	Unrated exposure where a derived rating is not used

r390 c330

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Methods to determine risk weights	Supervisory formula method
Role in the securitisation process	Sponsor

r390 c330	Type of securitisation	Securitisation
	Type of underlying	Underlying positions others than securitisation positions
	Use of external ratings	Without direct issue credit assessment

	Type of underlying	Underlying positions others than securitisation positions
r390 c440	Metric	Risk weighted exposure amount before CAP [mi]
	Base	Exposures

r390 c440	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions
	Role in the securitisation process		Sponsor
	Type of securitisation		Securitisation
	Type of underlying		Underlying positions others than securitisation positions
r400 c050	Metric		Original exposure pre conversion factors [mi]
	Base		Exposures
	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions
	Role in the securitisation process		Sponsor
	Type of securitisation		Securitisation. Effective number of exposures securitised less than six.
	Type of underlying		Underlying positions others than securitisation positions
r400 c060	Metric		CRM substitution effects - Unfunded credit protection: adjusted values (GA) [mi]
	Base		Exposures
	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions
	CRM Effects/Collateral		Unfunded credit protection - Substitution effect
	Role in the securitisation process		Sponsor
	Type of risk transfer		Traditional transactions
	Type of securitisation		Securitisation. Effective number of exposures securitised less than six.
	Type of underlying		Underlying positions others than securitisation positions
r400 c070	Metric		CRM substitution effects - Funded credit protection [mi]
	Base		Exposures
	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions
	CRM Effects/Collateral		Financial collateral simple method
	Role in the securitisation process		Sponsor
	Type of risk transfer		Traditional transactions
	Type of securitisation		Securitisation. Effective number of exposures securitised less than six.
	Type of underlying		Underlying positions others than securitisation positions
r400 c080	Metric		CRM substitution effects Outflows including value adjustments and provisions [mi]
	Base		Exposures
	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions
	CRM Effects/Collateral		CRM techniques substitution effect
	Role in the securitisation process		Sponsor
	Type of risk transfer		Traditional transactions
	Type of securitisation		Securitisation. Effective number of exposures securitised less than six.
	Type of underlying		Underlying positions others than securitisation positions
r400 c090	Metric		CRM substitution effects Inflows including value adjustments and provisions [mi]
	Base		Exposures
	Main category		Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class		Items representing securitisation positions

r400 c090	Role in the securitisation process	Sponsor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
r400 c100	Metric	Exposure after CRM substitution effects pre conversion factors, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Sponsor
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
r400 c110	Metric	CRM Financial collateral: adjusted value (Cvam) [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	CRM Effects/Collateral	CRM techniques Exposure value adjustment effect (Financial collateral comprehensive method SA)
	Role in the securitisation process	Sponsor
	Type of risk transfer	Traditional transactions
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
r400 c120	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Sponsor
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
r400 c130	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	0%
	Role in the securitisation process	Sponsor
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions
r400 c140	Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Conversion factors for off-balance sheet items	>0% and <=20%
	Role in the securitisation process	Sponsor
	Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
	Type of underlying	Underlying positions others than securitisation positions

COREP

r400 c150

Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Conversion factors for off-balance sheet items	>20% and <=50%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions

r400 c160

Metric	Fully adjusted exposure value E* including value adjustments and provisions [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Conversion factors for off-balance sheet items	>50% and <=100%
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions

r400 c170

Metric	Exposure value, including value adjustments and provisions [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions

r400 c180

Metric	Exposure value, including value adjustments and provisions, deducted from own funds [mi]
Base	Own funds
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions

r400 c190

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Securitisation. Effective number of exposures securitised less than six.
Type of underlying	Underlying positions others than securitisation positions

r400 c200

Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Exposures by Credit Quality steps at reporting date	CQS 1 & S/T CQS 1
Methods to determine risk weights	Ratings Based Method

r420 c380

Methods to determine risk weights	Internal Assessment Approach
Role in the securitisation process	Sponsor
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation
Use of external ratings	Without direct issue credit assessment

r420 c390

Metric	Reduction in RWA due to value adjustments and provisions [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation

r420 c400

Metric	Risk weighted exposure amount [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation

r420 c410

Metric	Risk weighted exposure amount [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of risk transfer	Synthetic transactions
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation

r420 c420

Metric	Overall effect (adjustment) due to infringement of the due diligence provisions [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation

r420 c430

Metric	Adjustment to the risk-weighted exposure amount due to maturity mismatches [mi]
Base	Exposures
Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
Exposure class	Items representing securitisation positions
Role in the securitisation process	Sponsor
Type of securitisation	Re-Securitisation
Type of underlying	Securitisation, Re-Securitisation

r420 c440

Metric	Risk weighted exposure amount before CAP [mi]
Base	Exposures

r420 c440	Main category	Instruments subject to securitisation credit risk treatment except Revolving securitisations with early amortisation - Off-balance sheet items and derivatives
	Exposure class	Items representing securitisation positions
	Role in the securitisation process	Sponsor
	Type of securitisation	Re-Securitisation
	Type of underlying	Securitisation, Re-Securitisation
r430 c170	Metric	Exposure value, including value adjustments and provisions [mi]
	Base	Exposures
	Main category	Instruments subject to securitisation credit risk treatment
	Exposures by Credit Quality steps at inception	CQS 1 & S/T CQS 1
r430 c180	Metric	Exposure value, including value adjustments and provisions, deducted from own funds [mi]
	Base	Own funds
	Main category	Instruments subject to securitisation credit risk treatment
	Exposures by Credit Quality steps at inception	CQS 1 & S/T CQS 1
r430 c190	Metric	Exposure value, including value adjustments and provisions, subject to risk weights [mi]
