Heatmap		3
Risk Indicators (RIs)		
Solvency	Tier 1 capital ratio	4
	Total capital ratio	5
	CET1 ratio	6
	CET1 ratio (fully loaded)	7
	Leverage ratio	8
Credit Risk and Asset Quality	Ratio of non-performing loans and advances (NPL ratio)	9
	Coverage ratio for non-performing loans and advances	10
	Forbearance ratio for loans and advances	11
	Ratio of non-performing exposures (NPE ratio)	12
Profitability	Return on equity	13
	Return on assets	14
	Cost to income ratio	15
	Net interest income to total net operating income	16
	Net fee and commission income to total net operating income	17
	Net trading income to total net operating income	18
	Net interest margin	19
	Cost of Risk	20
Funding and Liquidity	Loan-to-deposit ratio (for households and non-financial corporations)	21
	Asset encumbrance ratio	22
	Liquidity coverage ratio	23
	Net stable funding ratio	24
Annex 1: Statistical Annex	Coverage EU banking sample	26
	Asset composition and volumes	27
	Loans: composition and asset quality	28
	Loans: NPL and coverage ratios	29
	Distribution of NFC loans and advances by NACE code	30
	NPL ratios of NFC loans and advances by NACE code	31
	Exposures to Real Estate activities and Construction	32
	IFRS9 specific data	33
	Sovereign exposures	34
	Liability composition and volumes	35
	Liquidity	36
	Composition of own funds and risk-weighted assets	37
	Profitability analysis: main drivers within RoE	38
Annex 2: Methodological note or	n the RIs heatmap	40
Annex 3: The RI and Annex datab	base	42

Note: Traffic lights provide the trend of the RI risk indicator given the historical time series. Data bar colour scale: green for the "best bucket", yellow for the intermediate and red for the "worst bucket". Further explanations on the calculation of the heatmap can be found in the "methodological note" in the Annex of this Risk Dashboard.

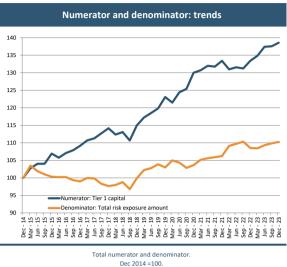

Solvency

Weighted Averages by country.

Weighted average. Banks are classified in the size class according to their average total assets between Dec. 2014 and Dec. 2023. Non-FINREP banks are assigned to the bucket of small banks.

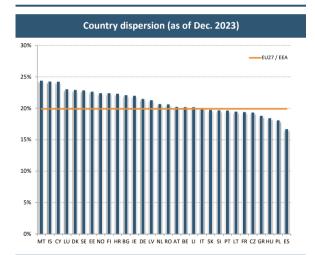

Period	Weighted average	25th	50th	75th
Dec - 14	13.5%	11.7%	13.6%	16.2%

(1) Institutions that are subsidiaries of a large institution with the Head Office in another EU/EEA country. They contribute to country aggregates but not to EU/EEA averages. For example, at country level the subsidiary in country X of a largest bank domiciled in country Y is included both in data for country and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for country X on a largest (2) Individual institutions that do not being to a banking group and report only on individual basis. These institutions are not required to submit FINREP data on solo basis to the EBA and therefore they are not included in FINREP-based risk individual basis.

indicators in this Risk Dashboard. (3) Institutions that are subsidiaries of an EU large institution. They contribute neither to country aggregates nor to EU/EEA averages because data for these institutions are included in the figures reported at consolidated basis by their parent companies.

companies. (4) Number of branches of the largest institutions autorised in each country. The largest institutions have their Head Office in another EU/EEA country and they have the right to passport their activities. They do contribute neither to country aggregates no to EU/EEA average because data for these institutions are included in the figures reported a consolidated basis by their parent.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for country S of a bank some country as a bank as a provide a sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for country S and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead. (1) Gross carrying amounts, ther than trading exposures. (2) Gross carrying amounts, loans and advances at amortised cost (excluding at fair value through OCI and through P&L, excluding trading exposures).

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for country or the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for country and is play minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead. (1) Gross carrying amounts, other than trading exposures. (2) Gross carrying amounts, ohans and advances at amortised costs (excluding at fair value through OCI and through P&L, excluding trading exposures).

Statistical Annex

Non-trading loans and advances to non-financial corporations by sector

The data is based on gross carrying amounts, other than held for trading.

The basis based on gross tarying amounts, youre tuamines on tuamines. Individual country of data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity) in the EU aggregate and subsidiaries, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Statistical Annex

Non-trading loans and advances to non-financial corporations by sector

The data is based on gross carrying amounts, other than held for trading. Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated enty domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, by the consolidated enty domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated enty domiciled in country Y is included both in data for country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Statistical Annex

Exposures to Real Estate activities and Construction - by country of counterparty

In compliance with the Recommendation ESR8/2016/14 on closing real estate data gaps, the EBA is disclosing aggregated information on the exposures towards non-financial corporations under Real Estate activities (NACE code L) and Construction Sector (NACE code F) ^[112]

(1) In discissing aggregated information on the real estate (RE) exposures towards the different national RE markets in the Union, the EBA made use of information in regulatory reporting templates that provide a breakdown of credit exposures. RE exposures are identified as those referred to as both the HACE codes 'P' and 'L', although strictly speaking some sub-categories would need to be excluded following the Commercial Real Estate (RE) editional adjust in the EBR Recommendation.

(2) Data is country aggregated on the basis of the residence of the immediate counterparty. The information on the geographical distribution of exposures by country is reported by institutions where non-domestic original exposures in all 'non-domestic' countries in all exposures classes are equal or higher than 10 % of total domestic and non-domestic original exposures. For this purpose exposures shall be deemed to be domestic where they are exposures to counterparties tocated in the Memee State where the institution is located.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries. X and Y (for the latter as part of the consolidated entity), in the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of Banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minior variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

(1) Applicable only to IFRS reporting banks. Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

(1) Direct exposures through Non-derivative financial assets. Information on sovereign exposures is only available for institutions that have sovereign exposures of at least 1% of total "Debt securities and loans receivables". (2) The breakdown by accounting portfolios refers to the Total carrying amount of General governments exposures through Non-derivative financial assets.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter is part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter is part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter is part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is included both in data for countries X and Y (for the latter is part of the consolidated entity). In the EU aggregate, and subsidiaries of U both is included both in data for country is included both in data for countries and as a for the consolidated entity domiciled in country Y is included both in data for country is included b

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead. Other expenses include for instanced operations, impairment or (-) reversal of impairment on non-financial assets. These expenses are shown with a positive sign (like in the columns to the left). In case there are effects resulting in negative expenses (i.e. a positive income) they have a negative sign.

Methodological note

Risk Indicators' (RIs) heatmap

The heatmap provides a quick overview of the main RIs, in which it is possible to find the category, number and designation of the specific RI, its historic development and the three buckets in which each data point is assigned to across time (green for the "best" bucket, yellow for the intermediary one and red for the "worst" bucket). The "sample of reporting banks" returns the actual number of banks that submitted the expected data for that reference date (consolidated view).

For each of the RIs' quarterly data, the distribution across the three buckets is computed in respect of the sum of total assets for all banks that are included in the EBA's reporting sample in each reference date. From reference periods March 2020 onwards, the sum of total asses no longer includes UK banks.. Thus, if we observe any given bucket increasing its percentage, we immediately acknowledge that more assets are being assigned to that bucket. However, this does not necessarily mean that more banks are comprised within the bucket (the sum of total assets for all banks is fixed, as well as the total assets from each bank taken individually).

The traffic light of each RI can assume three colours (green, yellow and red) depending on the latest developments on the "worst" bucket of the RI comparing to the whole time series. If the "worst" bucket is progressing positively (i.e. in case fewer assets are being assigned to it), the traffic light should be moving away from red getting closer to green. The colour is computed considering the 33rd and the 67th percentile of the time series.

To help reading the heatmap, let us consider the example of the cost to income ratio:

	< 50%	12.6%	12.2%	12.5%	13.7%	14.5%	
Cost to income ratio	[50% - 60%]	<mark>2</mark> 5.0%	12.0%	<mark>32</mark> .6%	<mark>34</mark> .0%	<mark>36</mark> .3%	
	> 60%	62.5%	75.8%	54.9%	52.3%	49.3%	

The green traffic light for the ratio points to the good behaviour of this RI in the last quarter relating to past observations.

More than just declaring if the "worst" bucket has more or less percentage of assets assigned to it, this traffic light approach delivers simultaneously an insight to the latest developments in the RI's "worst" bucket and to the relative position of that data point comparing to all other observations in the same bucket.

The Risk Assessment (RA) meter summarizes the developments in all the KRIs included in the heatmap, providing a single measure. It is computed as the weighted average across the KRIs sum of total assets in the "intermediate" and "worst" bucket. The average is weighted in order to guarantee that each KRI category (solvency, credit risk and asset quality, earnings and balance sheet structure) receives the same weight. Since each category includes a different number of KRIs, the weight of each KRI is thus different. The risk perception increases with higher values of the RA meter: the closer to 100%, the higher the risk.

Intra-group and other liabilities	n/a	Ratio	Intra-group and other liabilities (A) / Volume of available stable funding (B)	C 84.00	0170, 0200, 0210	0030	C 84.00	0120	0030
Own funds (Tier 1 capital) volume	n/a		Tier 1 capital volume (A)	C 01.00	0015	0010	n/a	n/a	n/a
Capital instruments eligible as CET1 Capital	n/a	Ratio	Capital instruments eligible as CET1 Capital (A) / Tier 1 capital volume (B)	C 01.00	0030	0010	C01.00	0015	0010
Retained earnings	n/a	Ratio	Retained earnings (A) / Tier 1 capital volume (B)	C 01.00	0130	0010	C01.00	0015	0010
Accumulated other comprehensive income	n/a	Ratio	Accumulated other comprehensive income (A) / Tier 1 capital volume (B)	C 01.00	0180	0010	C01.00	0015	0010
Other CET1 components	n/a	Calculation	Residual Calculation: 1 - (A/B)	C 01.00	0030, 0130, 0180, 0530	0010	C01.00	0015	0010
Additional Tier 1 capital	n/a	Ratio	Additional Tier 1 capital	C 01.00	0530	0010	C01.00	0015	0010
RWA volume	n/a		RWA volume	C 02.00	0010	0010	n/a	n/a	n/a
		Calculated as SC	V_4 - Securitisation risk exposure amounts of total credit risk exposure amounts	n/a	n/a	n/a	n/a	n/a	n/a
Credit risk capital requirements (excl. securitisation)	SCV_4	Ratio	Risk-weighted exposure amounts for credit, counterparty credit and dilution risks and free deliveries (A) / Total risk exposure amount (B)	C 02.00	0040	0010	C 02.00	0010	0010
Securitisation capital requirements	n/a	Ratio	Securitization positions (SA and IRB) (A) / Risk-weighted exposure amounts for credit, counterparty credit and dilution risks and free deliveries (B)	C 02.00	0220, 0430, 0470	0010	C 02.00	0010	0010
Market risk capital requirements	SCV_8	Ratio	Total risk exposure amount for position, foreign exchange and commodities risks (A) / Total risk exposure amount (B)	C 02.00	0520	0010	C 02.00	0010	0010
Operational risk capital requirements	SCV_9	Ratio	Total risk exposure amount for OpR (A) / Total risk exposure amount (B)	C 02.00	0590	0010	C 02.00	0010	0010
Other capital requirements	n/a	Ratio	Residual in total capital requirements	n/a	n/a	n/a	n/a	n/a	n/a
Net interest income on equity (numerator annualised, denominator as average)	n/a	Ratio	(Interest income - Interest expense)(A) / Equity (B)	F 02.00	0010,0090	0010	F 01.03	0300	0010
Net fee & commission income on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Fee & commission income - Fee & commission expense (A) / Equity (B)	F 02.00	0200, 0210	0010	F 01.03	0300	0010
Net trading income (incl. FV result) on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Net Gains or (-) losses on financial assets and liabilities: held for trading, trading, non-trading financial assets mandatorily at fair value through profit or loss, designated at fair value through profit or loss (A) / Equity (B)	F 02.00	0280, 0285, 0287, 0290	0010	F 01.03	0300	0010
Other operating income on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Total net operating income - net interest income - Fee & commission income - net trading income (A) / Equity (B)	F 02.00	0010, 0090, 0200, 0210, 0280, 0285, 0287, 0290, 0355	0010	F 01.03	0300	0010
Staff expenses on equity (numerator annualised, denominator as average) [2]	n/a	Ratio	Staff expenses (A) / Equity (B)	F 02.00	0370	0010	F 01.03	0300	0010
Other admin. (incl. depreciation) expenses on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Other admin. (incl. depreciation) expanses (A) / Equity (B)	F 02.00	0380, 0390	0010	F 01.03	0300	0010
Provisions on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Provisions (A) / Equity (B)	F 02.00	0430	0010	F 01.03	0300	0010
Impairments (credit risk losses) on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Impairments (credit risk losses) (A) / Equity (B)	F 02.00	0460	0010	F 01.03	0300	0010
Contributions to resolution funds and DGS (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Cash contributions to resolution funds and deposit guarantee schemes (A) /Equity (B)	F 02.00	0385	0010	F 01.03	0300	0010
Other (incl. tax) on equity (numerator annualised, denominator as average) $^{\left[1\right] }$	n/a	Ratio	Profit or (-) loss for the year - Total operating income + Staff expenses + Other admin. Expenses + Cash contributions to resolution funds and deposit guarantee schemes + Provisions + Impairments (A) / Equity (B)	F 02.00	0670, 0355, 0370, 0380, 0385, 0390, 0430, 0460	0010	F 01.03	0300	0010

(1) The data points refer to the latest version of either FINREP tables ("F") or COREP tables ("C") (http://www.eba.europa.eu/regulation-and-poincy/supervisory-reporting/implementing-technical-standard-on-supervisory-reporting). For more information regarding the Risk indicators formulas, applicable to each reporting framework, please see the List and

Methodological Guide available here (http://www.eba.europa.eu/nsik-analysis-and-data/risk-indicators-guide).

(2) For the calculation of the average the previous December figure is used as an "anchor" for the subsequent year, and the second the number is taken from the latest quarter observation, i.e. Q1, Q2, Q3 or Q4.

(3) Applicable only to IFRS reporting banks.

(A) The formula presented in this document for this risk indicator differs from the formula presented in the EBA list of sisk indicators sublished on the EBA website which will be sublect to future resistore
