(\*) The sample used in the MDB covers banks for which both resources and a decision have been reported to EBA. The statistical annex uses a balanced sample over the past three periods.

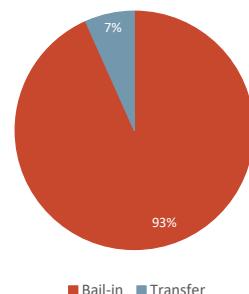

## State of resolution planning

This section provides an overview of the state of resolution planning at the level of resolution entities or groups with a strategy other than liquidation. Non-resolution entities are not covered in this section.

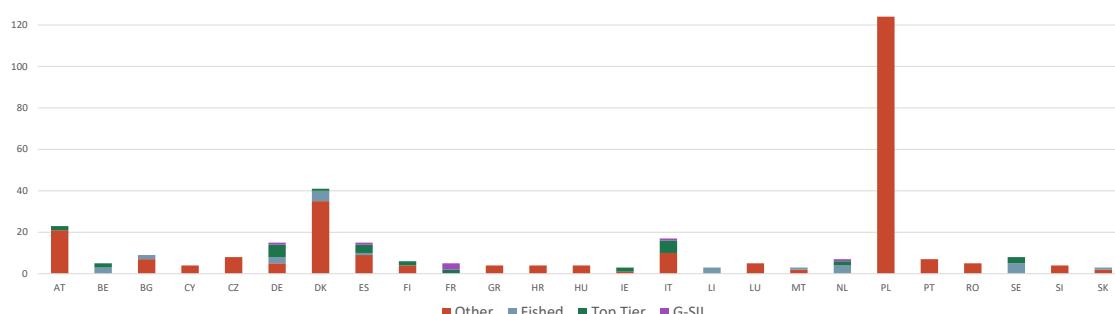

**Resolution banks in % of number of decisions (bail-in, transfer)**

**Resolution banks in % of RWAs (bail-in, transfer)**

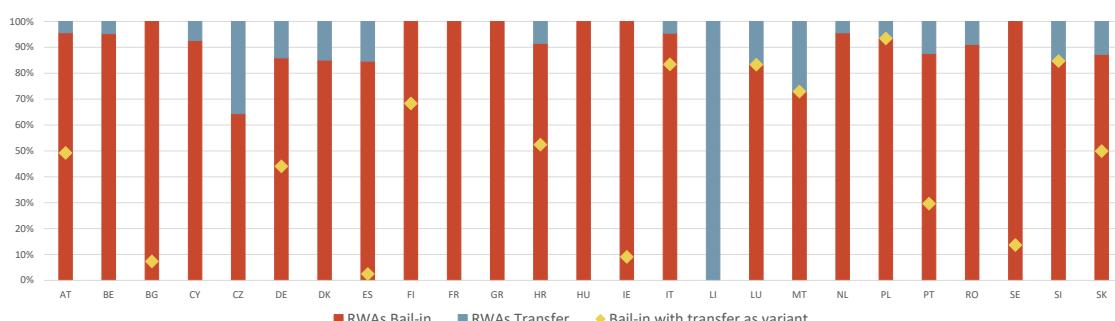

**Number of resolution banks by type of banks by member state**

**Number of resolution banks by type of strategy (bail-in vs. transfer) by member state**

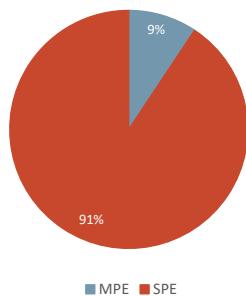

**Resolution banks by type of strategy (bail-in vs. transfer) in % of RWAs by member state**

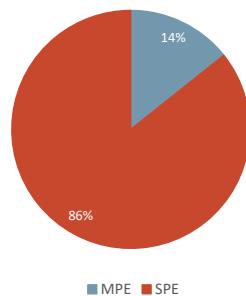

## State of resolution planning (cont')

This section provides an overview of the state of resolution planning at the level of resolution entities or groups with a strategy other than liquidation. Non-resolution entities are not covered in this section.

**MPE vs. SPE number of decisions**

**MPE vs. SPE % RWAs**

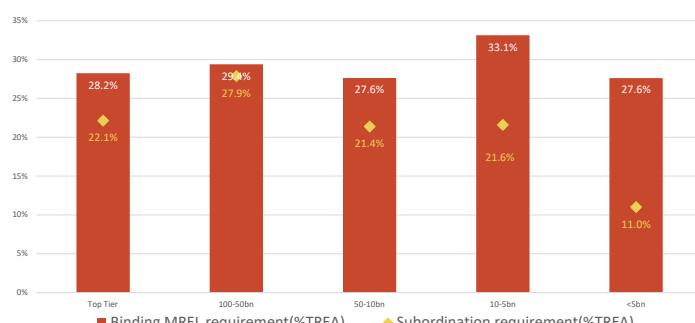

## External MREL binding requirements

In BRRD, MREL is calibrated on the basis of both TEM and TREA. This section shows the weighted average of the binding MREL requirement i.e. the higher of the MREL requirements, calibrated using (i) Total Risk Exposure Amount (TREA) requirement + Combined Buffer Requirement (CBR) and (ii) Total Exposure Measure (TEM) requirement. Those are then expressed in TREA.

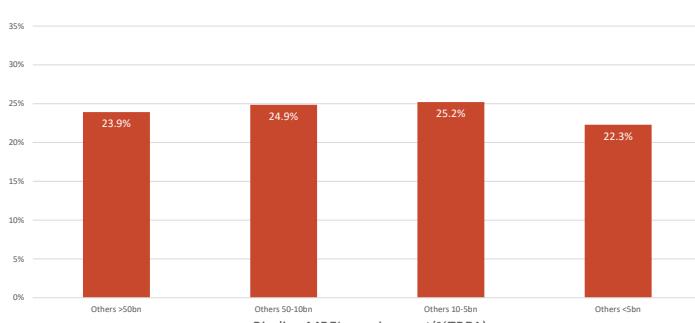

**Binding MREL requirement (total and subordinated) for GSII, Top-Tier/fished, Other banks %TREA**

**Binding MREL (total and subordinated) requirements for Top-Tier and fished banks %TREA**

**Binding MREL requirements for Other banks %TREA**

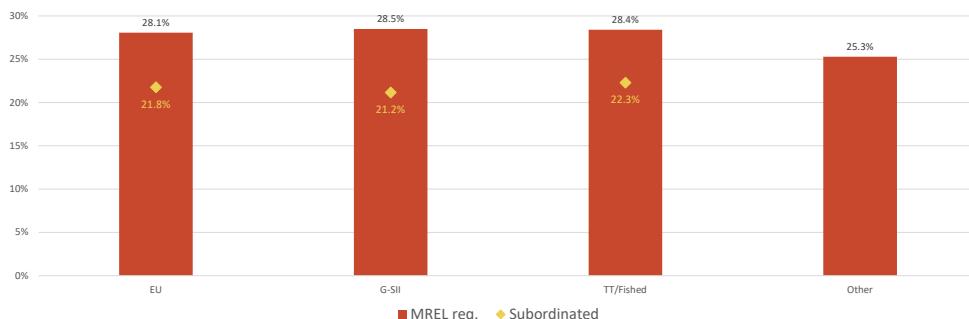

**Binding MREL requirements (total and subordinated) by MS %TREA**

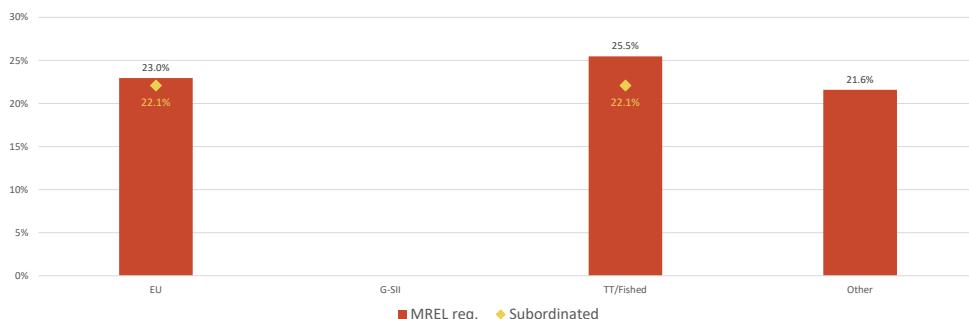

## External MREL binding requirements (cont')

In BRRD, MREL is calibrated on the basis of both TEM and TREA. This section shows the weighted average of the binding MREL requirement i.e. the higher of the MREL requirements, calibrated using (i) Total Risk Exposure Amount (TREA) requirement + Combined Buffer Requirement (CBR) and (ii) Total Exposure Measure (TEM) requirement. Those are then expressed in TREA.

**Binding MREL (total and subordinated) requirement by type of institution with Bail-in strategy**

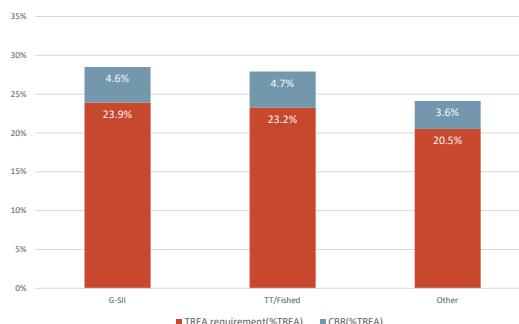

**Binding MREL (total and subordinated) requirement by type of institution with Transfer strategy**

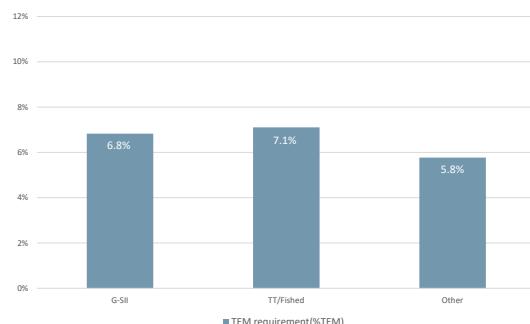

## External MREL requirements

In BRRD, MREL is calibrated on the basis of both TEM and TREA. This section shows the weighted averages averages of both legs of the MREL requirements for TREA and TEM. On the left-hand side (LHS), the MREL\_TREA + CBR requirement is expressed in terms of TREA. On the RHS, the MREL\_TEM requirement is expressed in terms of TEM.

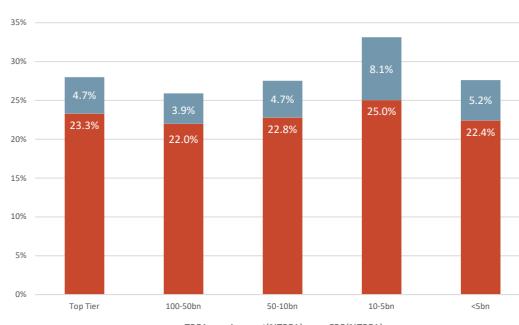

**MREL TREA requirement + CBR for GSII, Top-Tier/fished, Other banks**

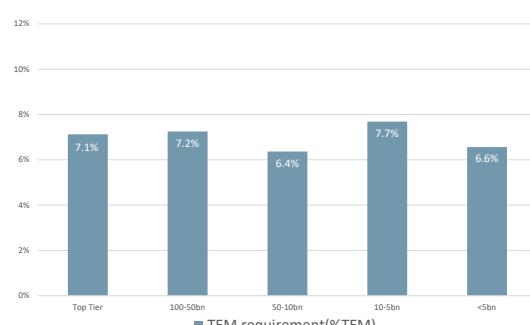

**MREL TEM requirement for GSII, Top-Tier/fished, Other banks**

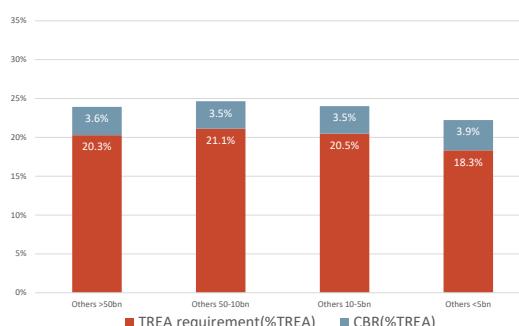

**MREL TREA requirement + CBR for Top-Tier and fished banks**

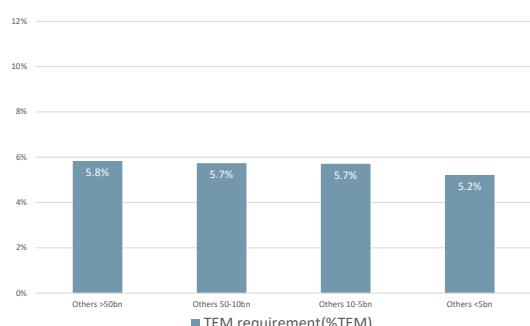

**MREL TEM requirement for Top-Tier and fished banks**

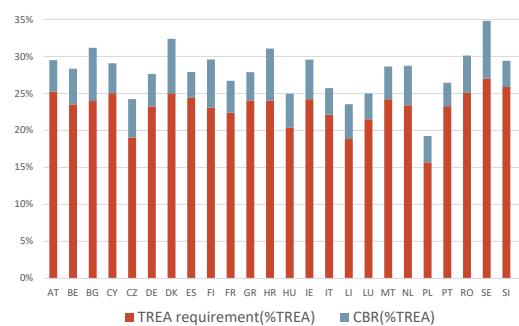

**MREL TREA requirement + CBR for Other banks**

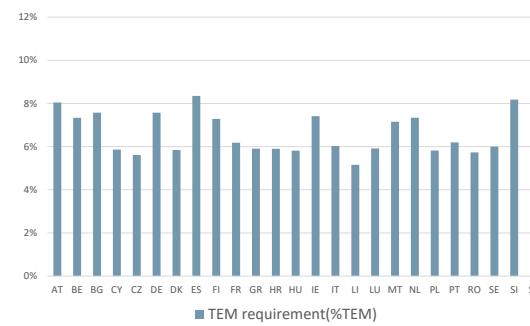

**MREL TEM requirement for Other banks**

**MREL TREA requirement + CBR by member state**

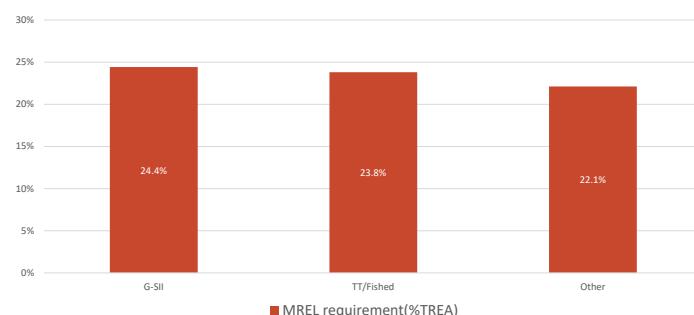

**MREL TEM requirement by member state**

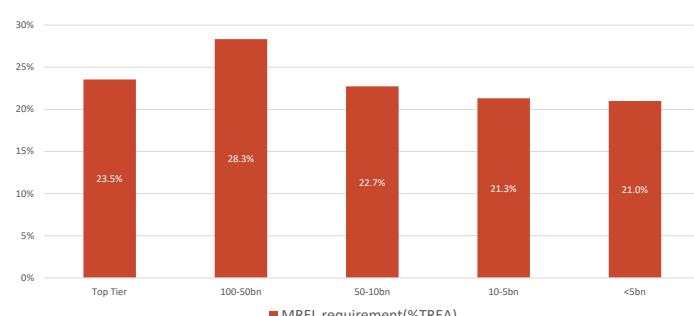

## Internal MREL binding requirements

This section shows the level of internal MREL (iMREL) set for non-resolution entities within resolution groups. These non resolution entities are categorised on the basis of the category of their resolution entity (G-SII, TT, Other). In BRRD, iMREL is calibrated on the basis of both TEM and TREA. This section shows the weighted average of the binding iMREL requirement i.e. the higher of the iMREL requirements, calibrated using (i) Total Risk Exposure Amount (TREA) requirement + Combined Buffer Requirement (CBR) and (ii) Total Exposure Measure (TEM) requirement. Those are then expressed in TREA.

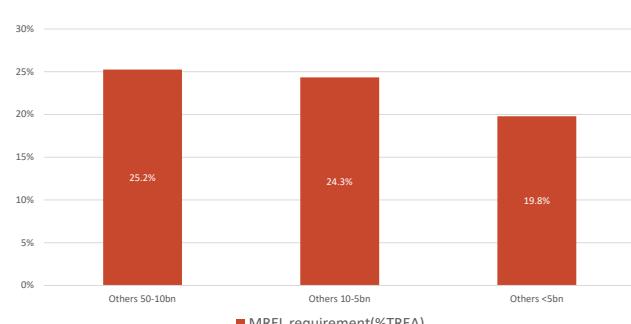

**Binding iMREL requirement for GSIs, Top-Tier/fished, Other banks %TREA**

**Binding iMREL requirements for Top-Tier and fished banks %TREA**

**Binding iMREL requirements for Other banks %TREA**

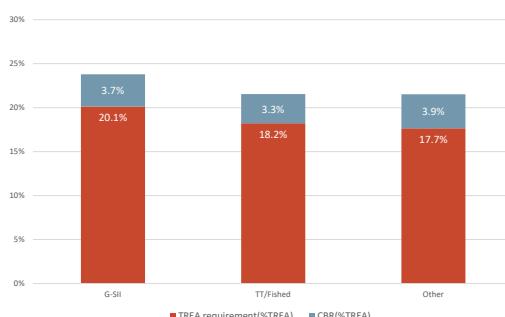

**Binding iMREL requirements by MS %TREA**

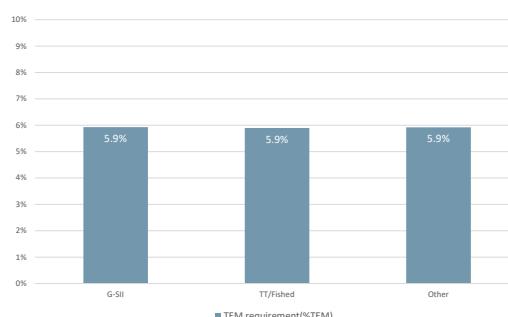

## Internal MREL requirements

This section shows the level of internal MREL (iMREL) set for non-resolution entities within resolution groups. These non resolution entities are categorised on the basis of the category of their resolution entity (GSII, TT, Other). In BRRD, iMREL is calibrated on the basis of both TEM and TREA. This section shows the weighted averages averages of both legs of the iMREL requirements for TREA and TEM. On the left-hand side (LHS), the MREL\_TREA + CBR requirement is expressed in terms of TREA. On the RHS, the MREL\_TEM requirement is expressed in terms of TEM.

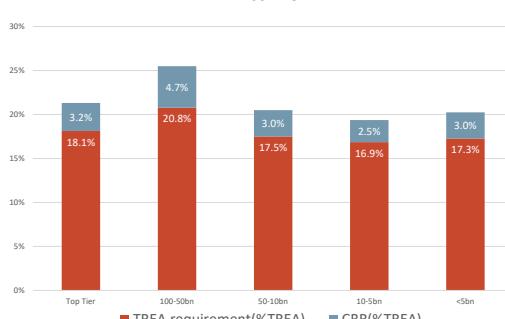

**iMREL TREA requirement + CBR for GSII, Top-Tier/fished, Other banks**

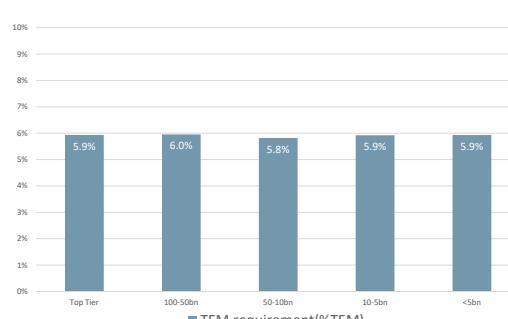

**iMREL TEM requirement for GSII, Top-Tier/fished, Other banks**

**iMREL TREA requirement + CBR for Top-Tier and fished banks**

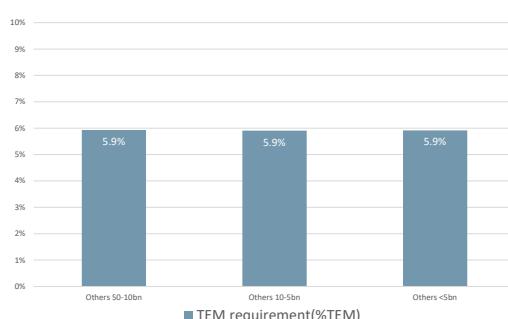

**iMREL TEM requirement for Top-Tier and fished banks**

**iMREL TREA requirement + CBR for Other banks**

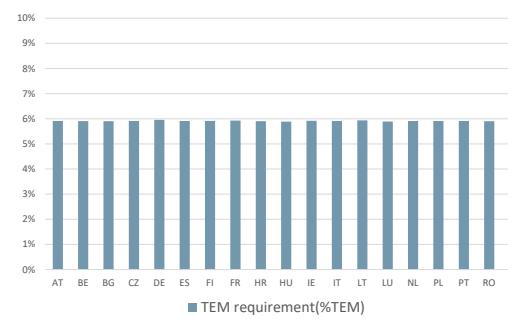

**iMREL TEM requirement for Other banks**

**iMREL TREA requirement + CBR by member state**

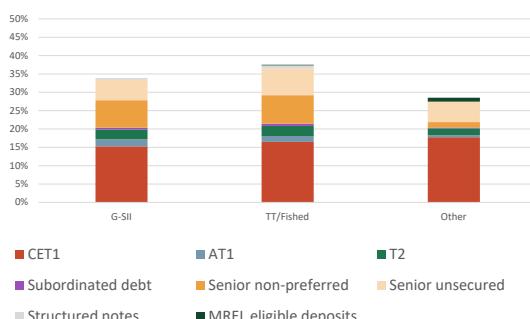

**iMREL TEM requirement by member state**

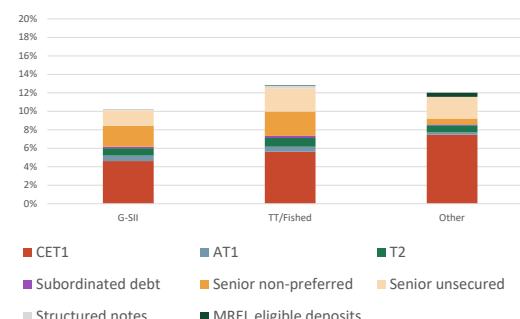

## MREL eligible resources

This section shows the weighted average resources for different categories of banks by instruments.

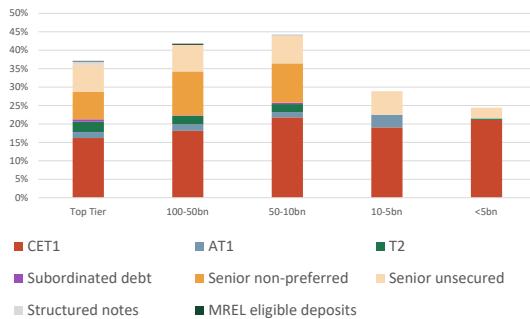

**MREL resources for GSII, Top-Tier/fished, Other banks %TREA**

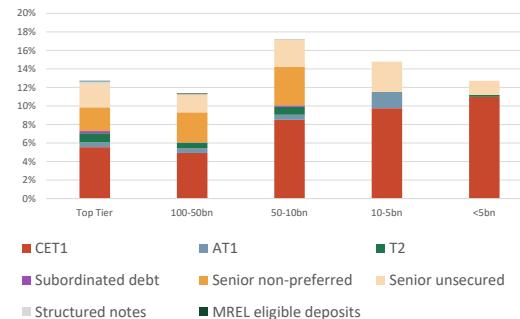

**MREL resources for GSII, Top-Tier/fished, Other banks %TEM**

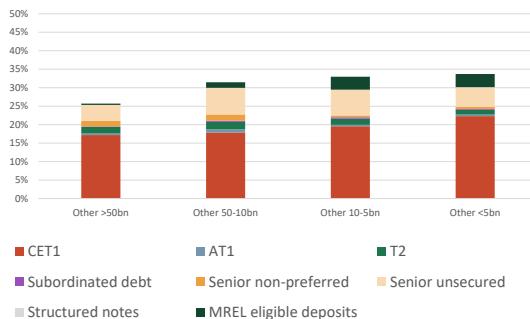

**MREL resources for Top-Tier/fished %TREA**

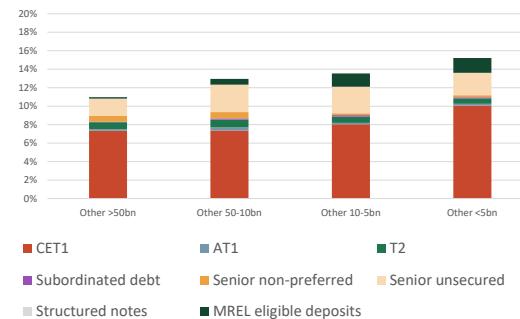

**MREL resources for Top-Tier/fished %TEM**

**MREL resources for other banks %TREA**

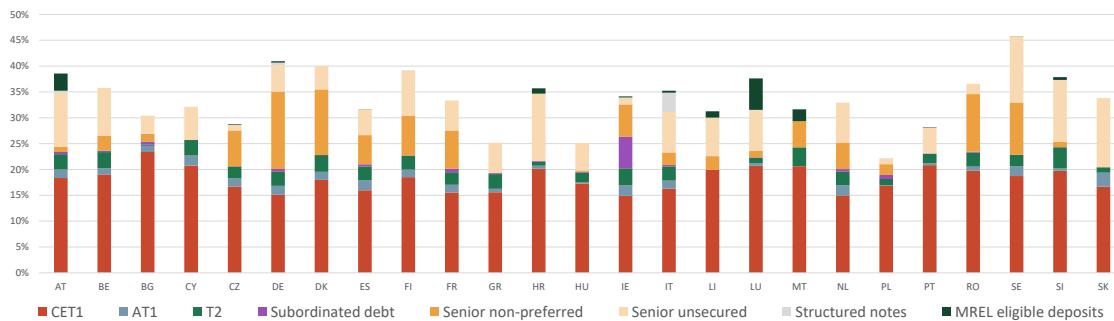

**MREL resources for other banks %TEM**

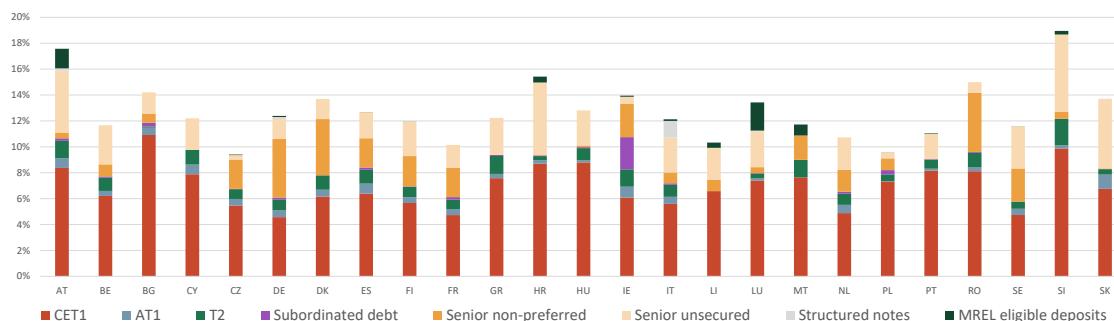

## MREL eligible resources by member state

This section shows the weighted average resources for each member states by instruments.

**MREL resources %TREA**

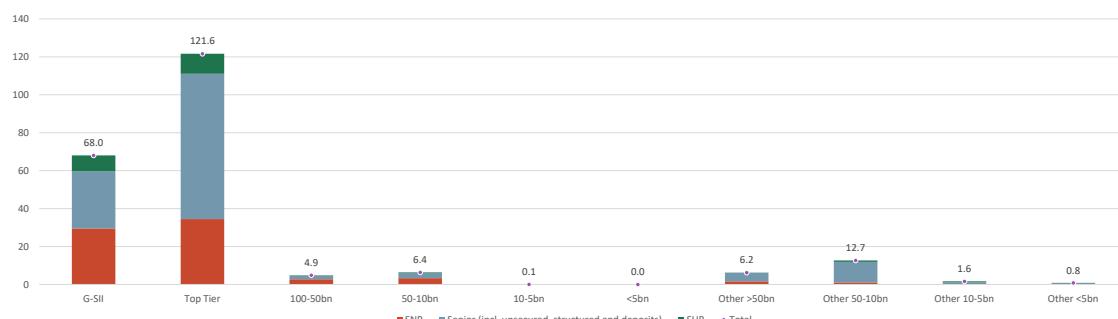

**MREL resources %TEM**

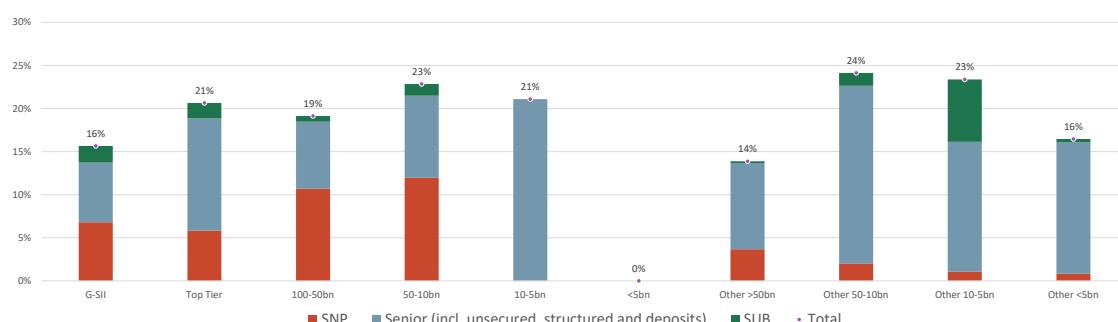

## Maturity profile

This section shows for each category of banks, the MREL eligible liabilities by instruments, with residual maturities between one and two years as of the reporting date.

(1) Some banks have been granted extensions for closing their shortfall beyond 30 June 2024.

(2) This implies a transition period up to 1 July 2025.

A balanced sample is used in the statistical annex, meaning that only banks with MREL/TLAC data in all reference dates are used in the aggregated statistics; this can lead to minor differences with the rest of the dashboard.

Blank cells mean no data is available for a country or less than 3 banks submitting MREL/TLAC data. In the shortfall columns, blank cells mean no shortfall or no data, and \* means shortfall but less than 3 banks with a shortfall. In the subordination columns, blank cells mean no subordination or no data.

Shortfalls are based on the end-state target for banks with a transition period ending beyond 30 June 2024. Shortfalls are based on the decision in force as of 1 May 2024 for those in steady state.

(1) Some banks have been granted extensions for closing their shortfall beyond 30 June 2024.

A balanced sample is used in the statistical annex, meaning that only banks with MREL/TLAC data in all reference dates are used in the aggregated statistics; this can lead to minor differences with the rest of the dashboard.

Blank cells mean no data is available for a country or less than 3 banks submitting MREL/TLAC data. In the shortfall columns, blank cells mean no shortfall or no data, and \* means shortfall but less than 3 banks with a shortfall. In the subordination columns, blank cells mean no subordination or no data.

Shortfalls are based on the end-state target for banks with a transition period ending beyond 30 June 2024. Shortfalls are based on the decision in force as of 1 May 2024 for those in steady state.

### Risk Indicators in the dashboard
