

Financial Services and Cloud Computing

Jan Neutze

Director, Cybersecurity Strategy and Policy

EMEA

@JanNeutze

Managing risk and providing assurance

Enabling customer control

Delivering transparency

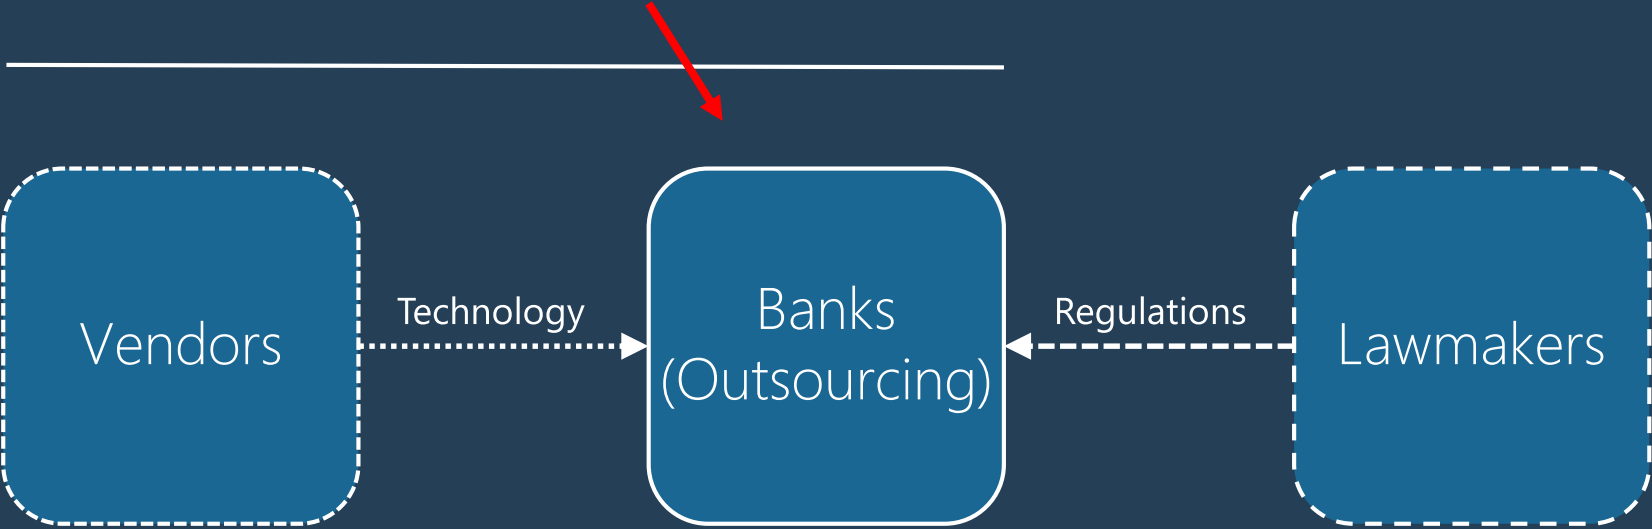

Supporting regulatory compliance

What kind of Cloud?

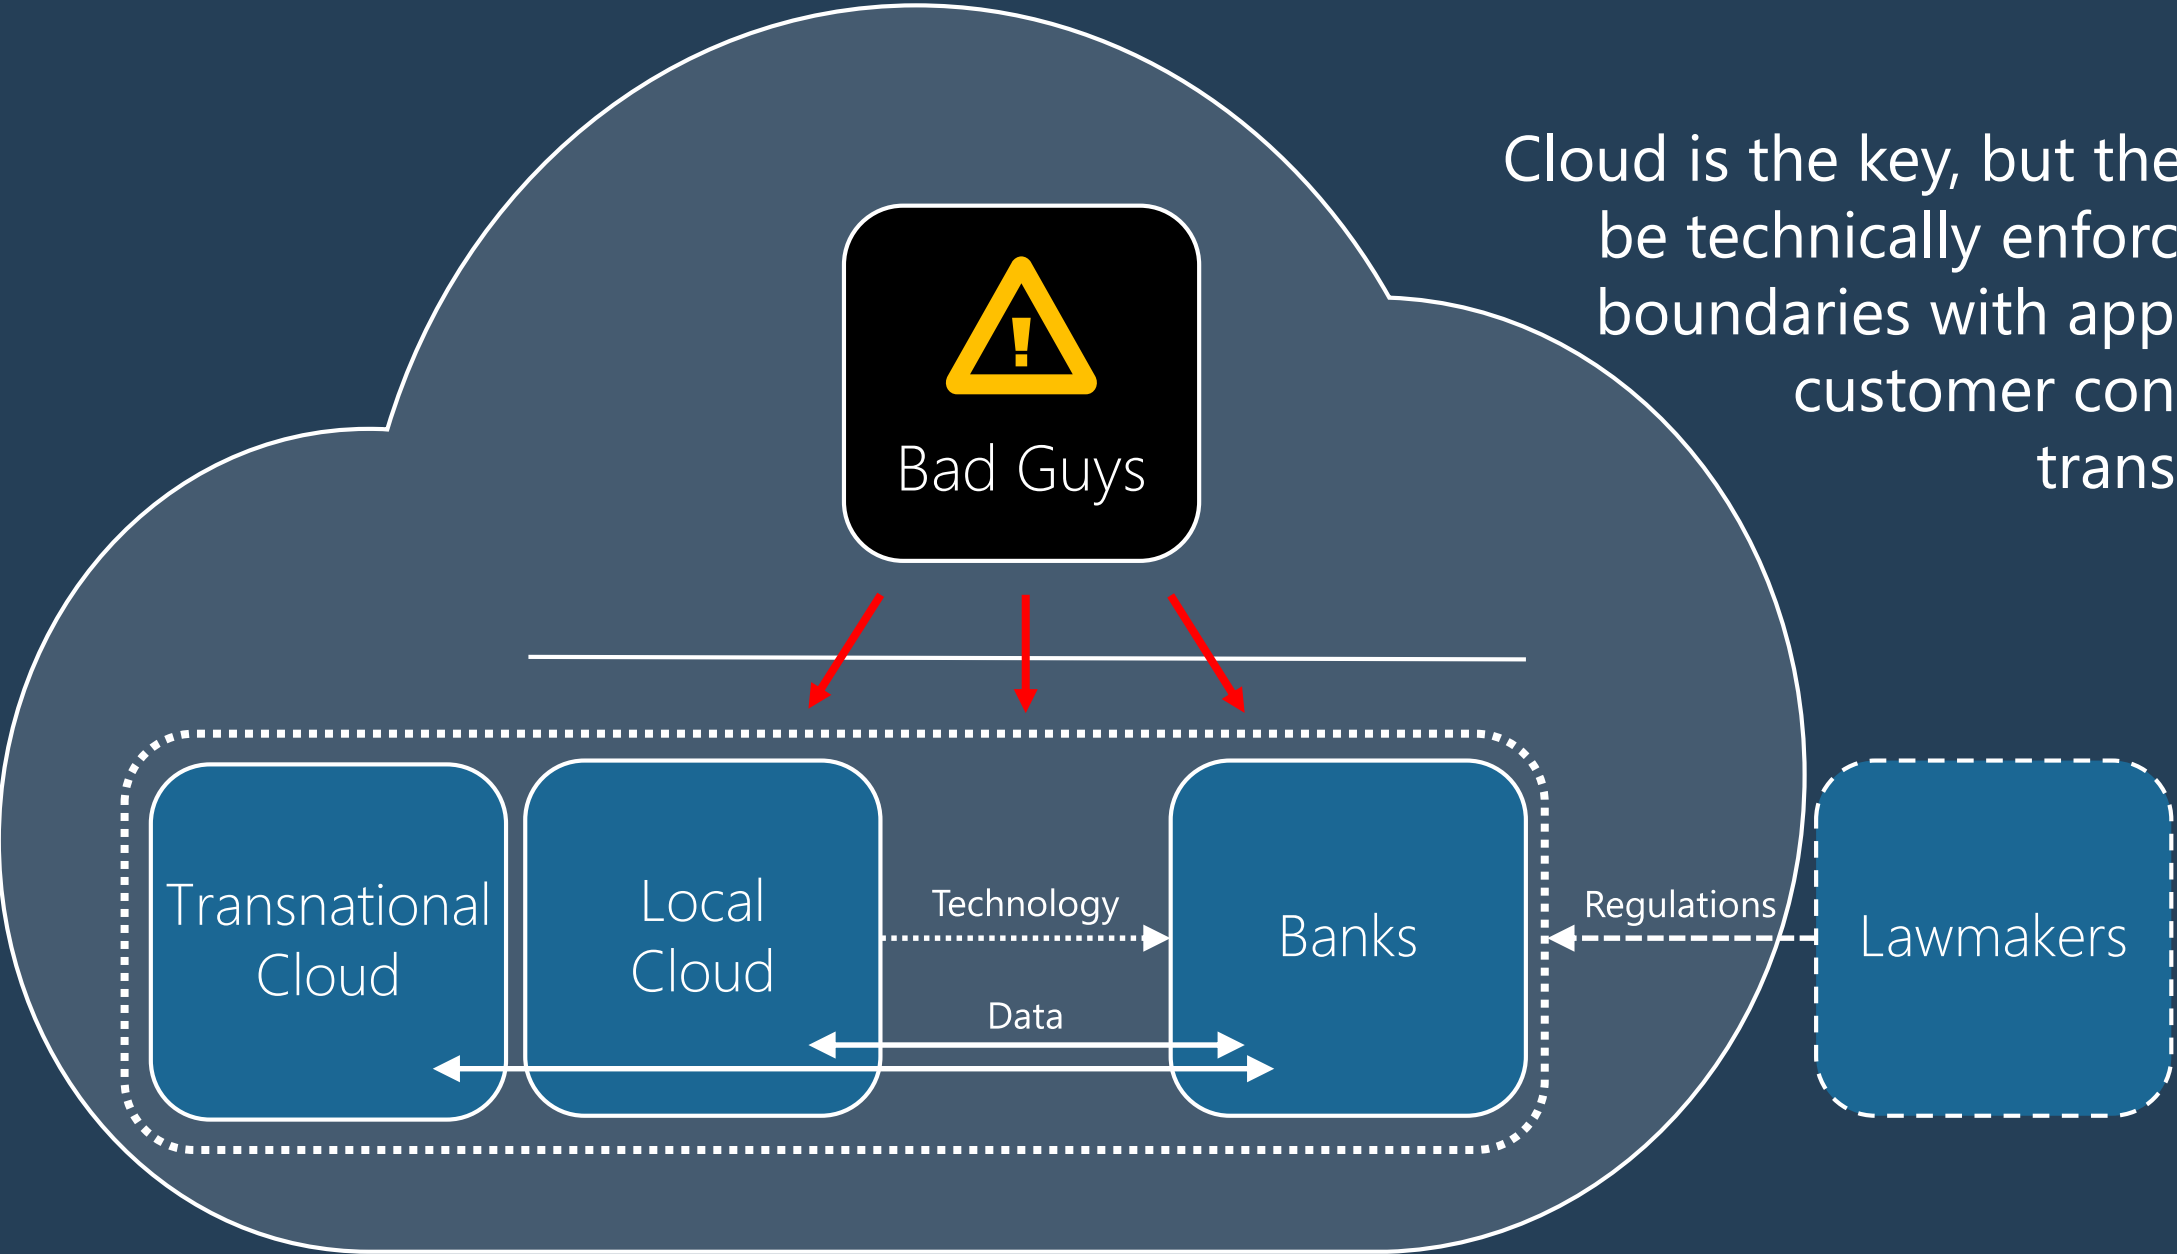

How is the Cloud secured?

What are banks using Cloud for?

Cloud is the key, but there must be technically enforced trust boundaries with appropriate customer control and transparency

Shared challenges facing industry and government

Navigating an uneven regulatory landscape

Assessing risk through major technology transitions

Assurance from CSP beyond audit results

Adapting to pace of cloud innovation

Thank You
