President Juncker's Political Guidelines

A connected Digital Single Market

"...break down national silos in telecoms regulation, in copyright and data protection legislation, in the management of radio waves and in the application of competition law."

Better online access to digital goods and services

Better access

for consumers

and businesses

To end unjustified geo-blocking

A more modern and European copyright framework

To modernise e-commerce

A more efficient and affordable parcel delivery

To reduce VAT burden

An environment where digital networks and services can prosper

Innovative services and advanced digital networks

An ambitious overhaul of EU telecoms rules

Review the audio-visual media framework Online platforms, intermediaries and sharing economy

Reinforce trust and security in digital services

Digital as a driver for growth

Enhance the growth potential of the digital economy

Data economy

Inclusive digital economy and society

Digital skills and e-government

Free flow of data

European Cloud Initiative

Standardisation and interoperability

Digital Single Market: supporting cloud in Europe

Enhance the Digital Economy
Cloud computing & other data services

Free flow of data initiative	European cloud initiative	Interoperability and standardisation	e-Government action plan

Digital Single Market

*A truly integrated Digital Single Market we can create up to **€340 billion** in additional growth, **hundreds of thousands of new jobs**, and a vibrant knowledge-based society in the EU.*

Digital Single Market

Free flow of data *- address key obstacles to the freedom of movement of data within the EU*

European Cloud

tackle fragmentation and raise the trust and confidence of users in cross-border cloud services through EU-wide specifications and certification

Interoperability & standardisation
increase interoperability of products and services

Building trust and confidence

Cloud Select Industry Group
- **Cloud Certification Schemes: List & Meta-framework**
- **Code of Conduct for Cloud Data Processors**
- **Cloud Service Level Agreements Checklist**

European Cloud Partnership
- **Steering Board report: Trusted Cloud Europe**

e-Identification and Services (eIDAS) Regulation.
Network and Information Security (NIS) Directive.
General Data Protection Regulation (GDPR).

European Cloud: European capability of cloud services

A framework for cloud resources to be combined together into a European high powered computing and cloud capability for: science, research and education, and for public administrations. For example, National Financial Supervisory Authorities (NFSAs).

Leveraging the European research cloud and connectivity network.

European Cloud: beyond the public sector

What governance and certification approaches for a European Cloud would help increase accountability against supervisory obligations?

How could we raise awareness of cloud security and educate Financial Institutions, users & SMEs?

Which continuous monitoring mechanisms for Cloud Service Providers increase transparency to give an aggregate view for risk management?
